

REAC MagicPAY

The revolutionary money card for gaming arcades

A system that offers many advantages for players and operators

Unleash the full potential of your gaming arcade with the MagicPAY system from REAC. Developed to revolutionize the way money is handled by players and operators, MagicPAY will make gaming faster and easier. MagicPAY offers maximum convenience for the players and higher revenues for the operators.

This win-win situation is even intensified by the fact that the MagicPAY card is an RFID smart card which means that the players don't have to insert the cards into card readers but just have to hold them against a marked spot on the machines in order to put credits on the machines. The process is extremely simple and requires no complex actions from the players.

Key Advantages

- ★ Uses RFID contactless smartcards
- ★ Available for all types of machines
- ★ All-in-one solution: Accounting, player tracking, cashless and jackpots
- ★ Topping up and pay out cards at cash desk or Cash Support kiosk

Operator Benefits

- ★ Increases revenues by improved game speed and uninterrupted play
- ★ Reduces operating expenses by less downtime for machine maintenance
- ★ Less mechanical parts, fewer machine tilts, no empty or jammed hoppers
- ★ Saves costs by reducing coin- and money handling
- ★ Real-time results without reconciliation
- ★ No "real" money in machines means less theft
- ★ Reduces hand pays – hand pay limit adjustable by operator
- ★ Enhances control of player options, e.g. limit the number of machines that can be played simultaneously
- ★ Offers possibility to issue anonymous and personalized cards for players
- ★ By issuing MagicPoints you receive a lot of player data, player tracking options in reporting

Player Appeal

- ★ No clumsy coin handling
- ★ Hands-free operation
- ★ Independent of machine denomination
- ★ Moving from one machine to the other is extremely easy
- ★ Playing on several machines with one card is possible
- ★ Players can reserve slot machines by using the MagicPAY card
- ★ No queuing at cash desk
- ★ Cashing remaining credits by another player is not possible
- ★ Point rewarding for placed bets

REAC and Cash Support have put their hands together in order to offer a complete cashless gaming solution for gaming arcades and casinos. The CTM-ONE and CTM-TC / CD greatly unburden cashiers at arcades and casinos from task such as money exchange, paying out winnings, issuing/loading and taking receipt of RFID cards, and other routine tasks. Players just insert money into one of the kiosks, receive their loaded magicPAY card and proceed to their chosen machine. If they wish to leave the gaming arcade, they return the card to one of the kiosks, receive their deposit and the balance on the card in cash and can leave the casino without having to queue at the cash desk.
